

Solution-Dyed Polyester Fabric

A REVOLUTIONARY NEW AWNING AND MARINE FABRIC

TOP NOTCH™ solution-dyed woven polyester has raised the bar on fabric availability for the awning and marine markets. TOP NOTCH™ is an advanced new hybrid of everything you want from both acrylic and polyester fabrics. This is the first time that all the best qualities of both acrylic and polyester fabrics have been combined into one product.

TOP NOTCH™ is an 840 Denier solution-dyed polyester fabric with a fluorocarbon finish that exhibits the color fastness and UV resistance long associated with solution-dyed acrylic fabrics. Yet, TOP NOTCH™ has the strength, durability, tear resistance, dimensional stability, and abrasion resistance of any premium quality polyester fabric. The fluorocarbon finish provides outstanding water repellency, oil and soil resistance, breathability, and a luxurious hand and appearance.

Width	60"
Weight, ounces per square yard	11.5
Tensile Strength, lbs. Warp x Fill	650 x 325
Tongue Tear, lbs. Warp x Fill	48 x 40
Water Repellency, Spray Rating	100
Hydrostatic, 8" for 10 minutes	0
